

SIGNS

BEI holds an extensive range of straight posts ranging from 34mm to 219mm diameter, we can cut to size up to 7.65m lengths.

Using our fabrication facilities, we can manufacture offset straight posts, wall mounted or any bespoke variation of the standard version.

Paint finishes and bolisha beacon options are also available on a short lead time.

BEI also stock the necessary plastic caps, base plates and clips.

GPRS Pulsa

An LED School Crossing Signal with an Internet based programming system using GPRS mobile communication technology. Utilising an extremely robust enclosure and fixing system, with long life, low energy LED light source giving a power consumption of 5W. This system is virtually maintenance free and has a proven history of vandal resistance, offering a long service life alongside a very low running cost.

- IP54 rated for reduced maintenance.
- Remote configuration via our web based system.
- Local or SMS operation also available.
- Real time remote fault monitoring.
- Email and text key event updates:
- Calendar update reminder.
- Manual activation detected.
- Integrated Google map identifies the location of each GPRS Pulsa.
- Smart phone compatible.
- Calendar held on each unit and web site.
- Future web site enhancements automatically available.
- Mains and solar powered versions available.

MiduStar

Raising the safety of uncontrolled pedestrian crossings, the MiduStar family of the Belisha beacons utilise the latest LED technology to enhance daytime visibility providing advanced warning to drivers. The MiduStar and ModuStar can be fitted and retro-fitted to existing posts in just a few minutes.

- High intensity LED arrays - Outstanding visibility on sunny days
- Pre-wired with a 24V AC transformer supplied
- Long life, low power LEDs - Low maintenance
- Vandal resistant globe fixing system
- IP56 sealing
- Designed to be fitted around a 76, 89 or 114mm circular post
- ModuStar (post top mounted) for 76mm and 114mm circular posts
- Independently adjustable LED arrays in each direction
- Night time dimming - Excellent visibility day and night
- Optional shroud pack for built up areas

LUB/ LUB LED

The LUB MkT is a proven signlight system, with over 20 years development and field use. It features a robust case aluminium head which fits to a range of anti-rotational fixing bracketry, to meet all site fixing requirements.

- Highly robust cast aluminium construction with concealed hinge
- Anti-rotational fixing systems to resist vandals and wind loading.
- IP54 rated
- Tamper proof access.
- Single handed gear tray removal for easier maintenance

The LUB MkT is now available with an optically engineered LED light engine designed to reduce energy consumption and extend maintenance intervals.

- Long life LED's offer significant savings
- From 14W total power consumption
- Illuminates signs up to 1500 x 1500mm
